INDEX TO SUBJECTS

A

Acetylcholine, effect on catecholamine, adrenal medullary cells, bovine, biochemistry and EM, 12
– receptors, antibody binding to, *Electrophorus* and *Torpedo* electroplax membrane, immunohistochemistry, 577
– receptors in Golgi apparatus, chick skeletal muscle cells, biochemistry and autoradiographic EM, 237
Acid secretion, oxyntic cell, frog gastric mucosa, ultrastructural changes and cyclic AMP, biochemistry and EM, 31
Acrosome absence, multiflagella, termite spermatozoon, Nomarski and scanning EM, 569
Actin bundles, intranuclear, induction of by dimethylsulfoxide, *Dictyostelium* interphase nucleus, EM, 146
Adhesion, aggregate interiors, 3T3 and SV40-virus transformed 3T3 cells, scanning EM, 639
– and detachment characteristics, Chinese hamster cell membrane mutants, biochemistry and cytology, 43
Adrenal medulla, bovine, functional and morphological characterization of isolated cells, biochemistry and EM, 12
Aequorin activation of medaka egg, propagated calcium wave, image intensification microscopy, 448
Alga *Chlamydomonas reinhardtii*, flagella, interrelationship between microtubules, striated fiber, and gametic mating structure, optical diffraction and EM, 430
– *Chlamydomonas reinhardtii*, flagellar mutants, structure and function of axoneme radial spokes and central tubules, biochemistry and light and EM, 729
Alloxan, effect on chlorotetracycline probe of calcium, mouse pancreatic islet cells, fluorescence microscopy, 652
AMP, cyclic, frog gastric mucosa oxyntic cells, biochemistry and EM, 31
Angelfish *Pterophyllum scalare*, melanophores, microtubular apparatus, EM, 605
– *Pterophyllum scalare*, melanophores, microtubules, immunofluorescence microscopy, 229
Antibody binding, acetylcholine receptors, *Electrophorus* and *Torpedo* electroplax membrane, immunohistochemistry, 577
–, steroid, localization in centrioles and basal bodies, immunofluorescence, 255
Arbacia, sperm, movement of flagella, cinemicrography, 310
ATPase activity in smooth membrane, human erythrocyte ghosts, biochemistry and EM, 105
Autoradiography, EM, resolution in, comparison of isotopes, 127
Axoneme doublets, multiflagella, termite spermatozoon, Nomarski and scanning EM, 569
– radial spokes and central tubules, *Chlamydomonas* flagella, biochemistry and light and EM, 729

B

Bacteria, phagocytosis of, membrane structure of rabbit polymorphonuclear leukocytes, freeze-fracture and scanning EM, 158
Baker's yeast, freeze-fracture in ultrahigh vacuum and very low temperature, 712
Basal bodies, localization of steroids, immunofluorescence, 255
Binding, dihydrocytochalasin B to 3T3 cells, biochemistry and cytology, 360
Bladder, urinary, frog, calcium modulation of epithelial water permeability, biochemistry, 787
Blood, human, subcellular localization of divalent cation probe chlorotetracycline, fluorometry and light microscopy, 386
Bone marrow, chick, plasma stimulation of heme accumulation and erythroid colony formation in culture, cytochemistry, 184
–, medullary, Japanese quail, osteoclast cell surface activation by parathyroid hormone, EM, 615
Brain, bovine, in vitro microtubule assembly, protofilament alterations, EM, 223
–, cow, guinea pig, and monkey, myelin basic protein, immunocytochemistry and immunofluorescence and EM, 502

C

Calcium modulation of epithelial water permeability, frog urinary bladder, biochemistry, 787
–, mouse pancreatic islet cells, probe by chlorotetracycline, effects of alloxan, sugars, methylxanthines, and magnesium, fluorescence microscopy, 652
– wave, medaka activated egg, image intensification microscopy, 448
Calf, eye lens, crystallin synthesis in isolated epithelium, autoradiography and biochemistry, 175
Capillary, muscle, mouse diaphragm, permeability to microperoxidase, light and EM, 341
Carassius auratus, eye, outer segment membrane shedding by visual cells, light and EM, 593
Carbohydrates, cell surface, changes during in vitro differentiation, lectin binding to avian neural crest cells, biochemistry and fluorescence microscopy and histochemistry, 628

Catecholamine release, adrenal medullary cells, bovine, biochemistry and EM, 12
Cation, divalent, intracellular release during stimulus-secretion coupling, mouse pancreatic acinar cells, use of fluorescent probe chlorotetracycline, biochemistry and fluorometry, 371
–, divalent, subcellular localization of probe chlorotetracycline, pancreatic acinar cells, fluorometry and light microscopy, 386
Cell cycle, *Paramecium tetraurelia*, regulation of macronuclear DNA content, cytochemistry and computer simulation, 116
Cells, 3T3 and SV3T3, biological effects and binding of dihydrocytochalasin B, biochemistry and cytology, 360
–, 3T3 and SV40-virus transformed, cell adhesion in aggregate interiors, scanning EM, 639
–, acinar, mouse pancreas, intracellular divalent cation release during stimulus-secretion coupling, use of fluorescent probe chlorotetracycline, biochemistry and fluorometry, 371
–, acinar, mouse pancreas, subcellular localization of divalent cation probe chlorotetracycline, fluorometry and light microscopy, 386
–, acinar, rat parotid gland, uptake of horseradish peroxidase by endocytic vesicles, cytochemical EM, 207
–, bovine adrenal medullary, functional and morphological characterization, biochemistry and EM, 12
–, chick bone marrow, plasma stimulation of heme accumulation and erythroid colony formation, cytochemistry, 184
–, chick embryo muscle, tropomyosin synthesis, biochemistry and cytology, 98
–, chick skeletal muscle, acetylcholine receptors in Golgi apparatus, biochemistry and autoradiographic EM, 237
–, Chinese hamster cell membrane mutants, adhesion and detachment characteristics, biochemistry and cytology, 43
–, epithelial, cytoplasmic filaments and gap junctions during wound healing, immunofluorescence and freeze-fracture EM, 561
–, HEp-2, steroid localization in centrioles and basal bodies, immunofluorescence, 255
–, human epidermal keratinocyte, terminal differentiation, role of protein synthesis and transglutaminase activity in formation of cross-linked envelope, biochemistry, 705
–, human fibroblasts, fibronectin distribution on surface membrane, immunofluorescence and immuno-EM, 748
–, Japanese quail neural crest, lectin binding during in vitro differentiation, biochemistry and fluorescence microscopy and histochemistry, 628
–, mouse neuroblastoma N18 and N103 and glioma G26, protein induction of tubulin polymerization, biochemistry and EM, 547
–, Novikoff hepatoma, low resistance junctions, correlation with gap junctional areas, electrophysiology and freeze-fracture EM, 532
–, oxyntic, frog gastric mucosa, ultrastructural changes and cyclic AMP, biochemistry and EM, 31
–, rat glial, strain C6, localization of high molecular weight microtubule accessory protein, immunofluorescence, 781
Cells, Sertoli, complex junctions between, dog testis, freeze-fracture and lanthanum tracer EM, 57
Centriole structure, multiflagellla, termite spermatozoon, Nomarski and scanning EM, 569
Centrioles, localization of steroids, immunofluorescence, 255
Chlamydomonas reinhardtii, flagella, interrelationship between microtubules, striated fiber, and gametic mating structure, optical diffraction and EM, 430
– *reinhardtii*, flagellar mutants, structure and function of axoneme radial spokes and central tubules, biochemistry and light and EM, 729
Chlorotetracycline, probe of calcium, effects of alloxan, sugars, methylxanthines, and magnesium, mouse pancreatic islet cells, fluorescence microscopy, 652
– probe of divalent cation, subcellular localization of, pancreatic acinar cells, fluorometry and light microscopy, 386
–, use as fluorescent probe, intracellular divalent cation release, pancreatic acinar cells, during stimulus-secretion coupling, biochemistry and fluorometry, 371
Cholecystokinin-pancreozymin, inhibition of enzyme secretion, rat pancreas, biochemistry and EM, 467
Cholinergic inhibition of enzyme secretion, rat pancreas, biochemistry and EM, 467
Cilia, *Tetrahymena*, dynein arm conformations, sliding force generation, light and EM, 261
Colchicine, fluorescein-, activity in sea urchin egg and sperm, light and fluorescence and scanning EM, 619
Colony formation in culture, erythroid, chick bone marrow cells, plasma stimulation of, cytochemistry, 184
Complex, ribonucleoprotein, containing HnRNA, rat liver nuclear skeleton, biochemistry and EM, 675
Computer, mask analysis of EM autoradiographs, 127
Concanavalin A receptors, lateral electrophoresis of, embryonic muscle cell membrane, biochemistry and fluorescence microscopy, 483
Coprinus cinereus, spindle pole body, fusion and division of during meiosis, light and EM, 761
Coturnix coturnix japonica, medullary bone, osteoclast cell surface activation by parathyroid hormone, EM, 615
Cow, brain, in vitro microtubule assembly, protofilament alterations, EM, 223
–, brain, myelin basic protein, immunocytochemistry and immunofluorescence and EM, 502
Crystallin synthesis, calf lens epithelium, autoradiography and biochemistry, 175
Cytotrophoblast, human placenta, glycoprotein synthesis, autoradiographic light and EM, 418
–, human placenta, protein synthesis, autoradiographic light and EM, 400

D

Detachment and adhesion characteristics, Chinese ham-

ster cell membrane mutants, biochemistry and cytology, 43
Diaphragm, mouse, muscle capillaries, permeability to microperoxidase, light and EM, 341
Dictyostelium discoideum and *D. mucoroides*, interphase nucleus, dimethyl sulfoxide induction of intranuclear actin bundles, EM, 146
Differentiation, in vitro, avian neural crest cells, lectin binding during, biochemistry and fluorescence microscopy and histochemistry, 628
Dihydrocytochalasin B, biological effects and binding to 3T3 cells, biochemistry and cytology, 360
Dimethyl sulfoxide induction of intranuclear actin bundles, *Dictyostelium* interphase nucleus, EM, 146
DNA, kinetoplast, characterization of, *Trypanosoma brucei* bloodstream form, biochemistry and EM, 293
–, regulation of, *Paramecium tetraurelia*, macronucleus, cytochemistry and computer simulation, 116
Dog, testis, complex junctions between Sertoli cells, freeze-fracture and lanthanum tracer EM, 57
Dynein arm conformation, sliding force generation, *Tetrahymena* cilia, light and EM, 261

E

Earthworm, muscle cell, postjunctional membranes, particle arrays, freeze-fracture EM, 76
Egg, medaka, propagated calcium wave, image intensification microscopy, 448
–, sea urchin, binding of fluorescein colchicine, light and fluorescence and scanning EM, 619
Electrical coupling, correlation with gap junctional areas, Novikoff hepatoma cells, electrophysiology and freeze-fracture EM, 532
Electron microscopy, freeze-fracturing in ultrahigh vacuum at −196°C, 712
– microscopy, resolution in autoradiography, comparison of isotopes, 127
Electrophorus electricus, electric tissue, antibody binding to acetylcholine receptors, immunohistochemistry, 577
Electroplax, *Torpedo* and *Electrophorus*, antibody binding to acetylcholine receptors, immunohistochemistry, 577
Endocytosis, horseradish peroxidase uptake, rat parotid acinar cells, cytochemical EM, 207
Envelope, cross-linked, human epidermal keratinocytes, role of protein synthesis and transglutaminase activity in formation of, biochemistry, 705
–, nuclear, rat liver, isolation with polyanions, biochemistry and EM, 191
Enzyme, ATPase activity in smooth membrane, human erythrocyte ghosts, biochemistry and EM, 105
–, horseradish peroxidase uptake by endocytic vesicles, rat parotid acinar cells, cytochemical EM, 207
–, microperoxidase, permeability to of mouse diaphragm muscle capillaries, light and EM, 341
– secretion, rat pancreas, inhibition by secretagogues, biochemistry and EM, 467
–, transglutaminase, role in formation of cross-linked envelope, human epidermal keratinocytes, biochemistry, 705
Enzymes, acid phosphatase and thiamine pyrophosphatase, lipoprotein and GERL, rat hepatocytes, cytochemical EM, 1
Epithelium, calf lens, crystallin synthesis, autoradiography and biochemistry, 175
Erythrocyte ghosts, human, peripheral proteins and smooth membrane, segregation of ATPase activity, biochemistry and EM, 105
– membrane, human, surface protein distribution, immunochemistry and freeze-etch EM, 512
Erythroid colony formation in culture, chick bone marrow cells, plasma stimulation of, cytochemistry, 184
Exocytosis, adrenal medullary cells, bovine, biochemistry and EM, 12
Eye, calf, crystallin synthesis in lens epithelium, autoradiography and biochemistry, 175
–, goldfish, outer segment membrane shedding by visual cells, light and EM, 593

F

Fat secretion, membrane structure during, lactating rat mammary gland, freeze-fracture EM, 767
Fiber, striated, interrelationship with microtubules and gametic mating structure, *Chlamydomonas*, optical diffraction and EM, 430
Fibronectin distribution on surface membrane, human fibroblasts, immunofluorescence and immuno-EM, 748
Filaments, cytoplasmic, and gap junctions, epithelial cells and myofibroblasts during wound healing, immunofluorescence and freeze-fracture EM, 561
–, neuro-, disassembly of, rat peripheral nerve, EM, 50
–, proto-, alterations, in vitro microtubule assembly, bovine brain, EM, 223
Flagella, *Chlamydomonas reinhardtii*, interrelationship between microtubules, striated fiber, and gametic mating structure, optical diffraction and EM, 430
–, *Chlamydomonas*, structure and function of axoneme radial spokes and central tubules, biochemistry and light and EM, 729
–, multi-, termite spermatozoon, Nomarski and scanning EM, 569
–, sea urchin sperm, movement of, cinemicrography, 310
Fluorescein colchicine, activity in sea urchin egg and sperm, light and fluorescence and scanning EM, 619
Freeze-fracture technique, ultrahigh vacuum at −196°C, 712
Frog *Rana catesbeiana*, gastric mucosa, ultrastructural changes and cyclic AMP in oxyntic cells, biochemistry and EM, 31
–, urinary bladder, calcium modulation of epithelial water permeability, biochemistry, 787
Fungus *Coprinus cinereus*, spindle pole body, fusion and division of during meiosis, light and EM, 761

G

Galactose incorporation into glycoprotein, human placental cellular and syncytial trophoblast, autoradi-

ographic light and EM, 418
Gametic mating structure, interrelationship with microtubules and striated fiber, *Chlamydomonas*, optical diffraction and EM, 430
Gap junctional areas, correlation with low resistance junctions, Novikoff hepatoma cells, electrophysiology and freeze-fracture EM, 532
– junctions and cytoplasmic filaments, epithelial cells and myofibroblasts during wound healing, immunofluorescence and freeze-fracture EM, 561
Gastric mucosa, frog, ultrastructural changes and cyclic AMP in oxyntic cells, biochemistry and EM, 31
GERL and lipoprotein particles, rat hepatocytes, cytochemical EM, 1
Ghosts, human erythrocyte, peripheral proteins and smooth membrane, segregation of ATPase activity, biochemistry and EM, 105
Glutathione metabolism during phagocytosis, human polymorphonuclear leukocytes, biochemistry and EM, 439
Glycoprotein membrane, role in adhesion and detachment characteristics, Chinese hamster mutants, biochemistry and cytology, 43
– synthesis, human placental cellular and syncytial trophoblast, autoradiographic light and EM, 418
Goldfish *Carassius auratus*, eye, outer segment membrane shedding by visual cells, light and EM, 593
Golgi apparatus, acetylcholine receptors, chick skeletal muscle cells, biochemistry and autoradiographic EM, 237
– apparatus, *cis* and *trans* fractions, rat liver, role in intracellular transport of serum-destined proteins, biochemistry and EM, 87
Grain distribution, comparison of isotopes, resolution in EM autoradiography, 127
Granule membranes, secretion, rabbit parotid, selective removal of secretory contaminants, biochemistry and fluorography, 323
Guinea pig, brain, myelin basic protein, immunocytochemistry and immunofluorescence and EM, 502

H

Heme accumulation in culture, chick bone marrow cells, plasma stimulation of, cytochemistry, 184
Heparin, isolation of nuclear envelope, rat liver, biochemistry and EM, 191
Hepatocytes, rat, sites of lipoprotein particles and GERL, cytochemical EM, 1
–, rat, subcellular localization of divalent cation probe chlorotetracycline, fluorometry and light microscopy, 386
Hormone, parathyroid, activation of osteoclast cell surface, Japanese quail medullary bone, EM, 615
Horseradish peroxidase uptake by endocytic vesicles, rat parotid acinar cells, cytochemical EM, 207
Human, erythrocyte ghosts, peripheral proteins and smooth membrane, segregation of ATPase activity, biochemistry and EM, 105
–, erythrocyte membrane, surface protein distribution, immunochemistry and freeze-etch EM, 512
–, lymphocytes, steroid localization in centrioles and basal bodies, immunofluorescence, 255
Human, placenta, cellular and syncytial trophoblast, glycoprotein synthesis, autoradiographic light and EM, 418
–, placenta, cellular and syncytial trophoblast, protein synthesis, autoradiographic light and EM, 400
–, polymorphonuclear leukocytes, microtubule dynamics and glutathione metabolism during phagocytosis, biochemistry and EM, 439

I

Islet cells, mouse pancreas, chlorotetracycline probe of calcium, effects of alloxan, sugars, methylxanthines, and magnesium, fluorescence microscopy, 652
Isotope comparison, resolution in EM autoradiography, 127

J

Japanese quail *Coturnix coturnix japonica*, medullary bone, osteoclast cell surface activation by parathyroid hormone, EM, 615
Junctions, complex, between Sertoli cells, dog testis, freeze-fracture and lanthanum tracer EM, 57
–, gap, and cytoplasmic filaments, epithelial cells and myofibroblasts during wound healing, immunofluorescence and freeze-fracture EM, 561
–, low resistance, correlation with gap junctional areas, Novikoff hepatoma cells, electrophysiology and freeze-fracture EM, 532
–, membrane, earthworm muscle cells, particle arrays, freeze-fracture EM, 76

K

Kidney, rabbit, ouabain binding to renal tubules, autoradiography and biochemistry, 278
Kinetoplast DNA, characterization of, *Trypanosoma brucei* bloodstream form, biochemistry and EM, 293

L

Lactation, rat mammary gland, membrane structure during milk fat secretion, freeze-fracture EM, 767
Lanthanum tracer, complex junctions between Sertoli cells, dog testis, freeze-fracture EM, 57
Lectin binding during in vitro differentiation, avian neural crest cells, biochemistry and fluorescence microscopy and histochemistry, 628
Lens differentiation, crystallin synthesis in calf eye epithelium, autoradiography and biochemistry, 175
Leucine incorporation into protein, human placental cellular and syncytial trophoblast, autoradiographic light and EM, 400
Leukocytes, polymorphonuclear, human, microtubule dynamics and glutathione metabolism, phagocytosis, biochemistry and EM, 439
–, polymorphonuclear, rabbit, membrane structure during phagocytosis of bacteria, freeze-fracture and scanning EM, 158
Lipid biosynthesis, cytoplasmic surface of rat liver microsomal vesicles, autoradiography and biochemistry, 245
Lipoprotein particles and GERL, rat hepatocytes, cytochemical EM, 1

Liver, rat, Golgi apparatus, *cis* and *trans* fractions, role in intracellular transport of serum-destined proteins, biochemistry and EM, 87
–, rat, microsomal vesicles, lipid biosynthesis on cytoplasmic surface, autoradiography and biochemistry, 245
–, rat, nucleus, isolation of envelopes with polyanions, biochemistry and EM, 191
–, rat, nucleus, skeleton and ribonucleoprotein complexes containing HnRNA, biochemistry and EM, 675
–, rat, nucleus, skeleton and small molecular weight RNA, biochemistry and EM, 692
Lymphocytes, human, steroid localization in centrioles and basal bodies, immunofluorescence, 255
Lytechinus, sperm, movement of flagella, cinemicrography, 310

M

Macronucleus, *Paramecium tetraurelia*, regulation of DNA content, cytochemistry and computer simulation, 116
Macrophage, peritoneal, binding of fluorescein colchicine, light and fluorescence and scanning EM, 619
Magnesium, effect on chlorotetracycline probe of calcium, mouse pancreatic islet cells, fluorescence microscopy, 652
Mammary gland, rat, membrane structure during milk fat secretion, freeze-fracture EM, 767
Mask analysis of EM autoradiograms, computer program, 127
Mastotermes darwiniensis, spermatozoon, multiflagella, Nomarski and scanning EM, 569
Matrix protein, fibronectin of human fibroblasts. immunofluorescence and immuno-EM, 748
Maxi-circle, kinetoplast DNA, *Trypanosoma brucei* bloodstream form, biochemistry and EM, 293
Medaka *Oryzias latipes*, egg, propagated calcium wave, image intensification microscopy, 448
Meiosis, *Coprinus*, spindle pole body fusion and division, light and EM, 761
Melanophores, angelfish, microtubules, immunofluorescence microscopy, 229
–, *Pterophyllum scalare*, microtubular apparatus, EM, 605
Membrane, electroplax, *Torpedo* and *Electrophorus*, antibody binding to acetylcholine receptors, immunohistochemistry, 577
–, embryonic muscle cells, lateral electrophoresis of concanavalin A receptors, biochemistry and fluorescence microscopy, 483
–, erythrocyte, human, surface protein distribution, immunochemistry and freeze-etch EM, 512
– mutants, Chinese hamster cells, adhesion and detachment characteristics, biochemistry and cytology, 43
–, outer segment, rhythmic shedding of, goldfish eye, light and EM, 593
–, postjunctional, earthworm muscle cells, particle arrays, freeze-fracture EM, 76
–, secretion granule, rabbit parotid, selective removal of secretory contaminants, biochemistry and fluorography, 323
Membrane, smooth, human erythrocyte ghosts, segregation of ATPase activity, biochemistry and EM, 105
– structure during milk fat secretion, lactating rat mammary gland, freeze-fracture EM, 767
– structure during phagocytosis of bacteria, rabbit polymorphonuclear leukocytes, freeze-fracture and scanning EM, 158
–, surface, human fibroblasts, fibronectin distribution, immunofluorescence and immuno-EM, 748
Methylxanthines, effect on chlorotetracycline probe of calcium, mouse pancreatic islet cells, fluorescence microscopy, 652
Microperoxidase, permeability to of mouse diaphragm muscle capillaries, light and EM, 341
Microsome vesicles, rat liver, lipid biosynthesis on cytoplasmic surface, autoradiography and biochemistry, 245
Microtubule accessory high molecular weight protein, localization in rat glial cells, immunofluorescence, 781
– assembly in vitro, protofilament alterations, bovine brain, EM, 223
– dynamics during phagocytosis, human polymorphonuclear leukocytes, biochemistry and EM, 439
– formation, tubulin polymerization, effect of neuroblastoma proteins, biochemistry and EM, 547
– organization, *Pterophyllum scalare* melanophores, EM, 605
– sliding, dynein arm conformation, *Tetrahymena* cilia, light and EM, 261
Microtubules, angelfish melanophores, immunofluorescence microscopy, 229
–, interrelationship with striated fiber and gametic mating structure, *Chlamydomonas reinhardtii*, optical diffraction and EM, 430
Microvillar adhesion, aggregate interiors, 3T3 and SV40-virus transformed 3T3 cells, scanning EM, 639
Milk fat secretion, membrane structure during, lactating rat mammary gland, freeze-fracture EM, 767
Monkey, brain, myelin basic protein, immunocytochemistry and immunofluorescence and EM, 502
Motility, *Chlamydomonas* flagella, structure and function of axoneme radial spokes and central tubules, biochemistry and light and EM, 729
–, concanavalin A receptors, embryonic muscle cell membrane, biochemistry and fluorescence microscopy, 483
–, dynein arm conformation, *Tetrahymena* cilia, light and EM, 261
– and morphology, 3T3 cells, effect of dihydrocytochalasin B, biochemistry and cytology, 360
Mouse, diaphragm, muscle capillaries, permeability to microperoxidase, light and EM, 341
–, pancreas, acinar cells, intracellular divalent cation release during stimulus-secretion coupling, use of fluorescent probe chlorotetracycline, biochemistry and fluorometry, 371
–, pancreatic islets, chlorotetracycline probe of calcium, effects of alloxan, sugars, methylxanthines, and magnesium, fluorescence microscopy, 652
Muscle capillaries, mouse diaphragm, permeability to microperoxidase, light and EM, 341

Muscle cells, differentiating, tropomyosin synthesis, biochemistry and cytology, 98
– cells, embryonic toad, lateral electrophoresis of membrane concanavalin A receptors, biochemistry and fluorescence microscopy, 483
–, earthworm, postjunctional membranes, particle arrays, freeze-fracture EM, 76
Myelin basic protein, central and peripheral nervous system, immunocytochemistry and immunofluorescence and EM, 502
Myoblast membrane, lateral electrophoresis of concanavalin A receptors, biochemistry and fluorescence microscopy, 483
Myofibroblasts, cytoplasmic filaments and gap junctions during wound healing, immunofluorescence and freeze-fracture EM, 561

N

Nerve, peripheral, rat, disassembly of neurofilaments, EM, 50
Nervous system, central and peripheral, cow, guinea pig, and monkey, myelin basic protein, immunocytochemistry and immunofluorescence and EM, 502
Neurofilaments, disassembly of, rat peripheral nerve, EM, 50
Nucleus, interphase, *Dictyostelium*, dimethyl sulfoxide induction of intranuclear actin bundles, EM, 146
–, rat liver, isolation of envelopes with polyanions, biochemistry and EM, 191
–, rat liver, skeleton and ribonucleoprotein complexes containing HnRNA, biochemistry and EM, 675
–, rat liver, skeleton and small molecular weight RNA, biochemistry and EM, 692

O

Oryzias latipes, egg, propagated calcium wave, image intensification microscopy, 448
Osteoclast cell surface activation by parathyroid hormone, Japanese quail medullary bone, EM, 615
Ouabain binding to rabbit renal tubules, autoradiography and biochemistry, 278
Outer segment membrane, rhythmic shedding of, goldfish eye, light and EM, 593

P

Pancreas, islet cells, mouse, chlorotetracycline probe of calcium, effects of alloxan, sugars, methylxanthines, and magnesium, fluorescence microscopy, 652
–, mouse, acinar cells, intracellular divalent cation release during stimulus-secretion coupling, use of fluorescent probe chlorotetracycline, biochemistry and fluorometry, 371
–, mouse, acinar cells, subcellular localization of divalent cation probe chlorotetracycline, fluorometry and light microscopy, 386
–, rat, secretagogue inhibition of enzyme secretion, biochemistry and EM, 467
Paracrystalline arrays, freeze-fracture in ultrahigh vacuum and very low temperature, 712
Paramecium tetraurelia, macronucleus, regulation of DNA content, cytochemistry and computer simulation, 116
Parathyroid hormone, activation of osteoclast cell surface, Japanese quail medullary bone, EM, 615
Parotid gland, rabbit, secretion granule membranes, selective removal of secretory contaminants, biochemistry and fluorography, 323
– gland, rat, acinar cells, uptake of horseradish peroxidase by endocytic vesicles, cytochemical EM, 207
Particle arrays, earthworm muscle cell postjunctional membranes, freeze-fracture EM, 76
Particles, lipoprotein, and GERL, rat hepatocytes, cytochemical EM, 1
Phagocytosis of bacteria, membrane structure of rabbit polymorphonuclear leukocytes, freeze-fracture and scanning EM, 158
–, human polymorphonuclear leukocytes, microtubule dynamics and glutathione metabolism during, biochemistry and EM, 439
Phosphatidylcholine synthesis, cytoplasmic surface of rat liver microsomal vesicles, autoradiography and biochemistry, 245
Phosphatidylethanolamine synthesis, cytoplasmic surface of rat liver microsomal vesicles, autoradiography and biochemistry, 245
Placenta, human, cellular and syncytial trophoblast, glycoprotein synthesis, autoradiographic light and EM, 418
–, human, cellular and syncytial trophoblast, protein synthesis, autoradiographic light and EM, 400
Polyanion isolation of nuclear envelope, rat liver, biochemistry and EM, 191
Protein, basic, myelin, central and peripheral nervous system, immunocytochemistry and immunofluorescence and EM, 502
– contaminants, selective removal of from rabbit parotid secretion granule membranes, biochemistry and fluorography, 323
–, high molecular weight microtubule accessory, localization in rat glial cells, immunofluorescence, 781
–, matrix, fibronectin of human fibroblasts, immunofluorescence and immuno-EM, 748
–, neuroblastoma cells, induction of tubulin polymerization, biochemistry and EM, 547
–, peripheral, human erythrocyte ghosts, segregation of ATPase activity into smooth membrane, biochemistry and EM, 105
–, serum-destined, passage through rat liver Golgi apparatus *cis* and *trans* fractions, biochemistry and EM, 87
–, surface, distribution of, human erythrocyte membrane, immunochemistry and freeze-etch EM, 512
– synthesis, human placental cellular and syncytial trophoblast, autoradiographic light and EM, 400
– synthesis, role in formation of cross-linked envelope, human epidermal keratinocytes, biochemistry, 705
Protofilament alterations, in vitro microtubule assembly, bovine brain, EM, 223
Protozoan *Paramecium tetraurelia*, macronucleus, regulation of DNA content, cytochemistry and computer simulation, 116
– *Tetrahymena pyriformis*, cilia, dynein arm

conformations, sliding force generation, light and EM, 261
Protozoan *Trypanosoma brucei*, bloodstream form, kinetoplast DNA, biochemistry and EM, 293
Pterophyllum scalare, melanophores, microtubular apparatus, EM, 605
– *scalare*, melanophores, microtubules, immunofluorescence microscopy, 229

R

Rabbit, kidney, ouabain binding to renal tubules, autoradiography and biochemistry, 278
–, parotid gland, secretion granule membranes, selective removal of secretory contaminants, biochemistry and fluorography, 323
–, polymorphonuclear leukocytes, membrane structure during phagocytosis of bacteria, freeze-fracture and scanning EM, 158
–, skin, epithelial cells and myofibroblasts, cytoplasmic filaments and gap junctions during wound healing, immunofluorescence and freeze-fracture EM, 561
Radioactive label, [^{14}C]algal protein hydrolysate, [^{14}C]proline, [^{14}C]tyrosine, and [^{14}C]- and [^{3}H]leucine, rabbit parotid secretion granule membranes, selective removal of secretory contaminants, biochemistry and fluorography, 323
– label, [^{14}C]choline, [^{14}C]ethanolamine, [^{3}H]glycerol 3-phosphate, [^{3}H]palmitoyl-CoA, and [^{32}P]ATP, lipid biosynthesis on cytoplasmic surface of rat liver microsomal vesicles, autoradiography and biochemistry, 245
– label, [^{14}C]glucose, bovine adrenal medulla, functional and morphological characterization of isolated cells, biochemistry and EM, 12
– label, [^{14}C]glucose, microtubule dynamics and glutathione metabolism during phagocytosis, human polymorphonuclear leukocytes, biochemistry and EM, 439
– label, [^{14}C]inulin, [^{3}H]deoxyglucose and [^{3}H]- cytochalasin B, biological effects and binding of dihydrocytochalasin B to 3T3 cells, biochemistry and cytology, 360
– label, [^{14}C]inulin and [^{3}H]ouabain, ouabain binding to rabbit renal tubules, autoradiography and biochemistry, 278
– label, [^{14}C]polystyrene, comparison with [^{3}H] and [^{125}I], resolution in EM autoradiography, 127
– label, [^{14}C]- and [^{3}H]leucine, passage of serum-destined proteins through rat liver Golgi apparatus *cis* and *trans* fractions, biochemistry and EM, 87
– label, [^{3}H]amino acids and [^{3}H]borohydride, Chinese hamster cell membrane mutants, adhesion and detachment characteristics, biochemistry and cytology, 43
– label, [^{3}H]colchicine, fluorescein colchicine activity in sea urchin egg and sperm, light and fluorescence and scanning EM, 619
– label, [^{3}H]galactose, glycoprotein synthesis, human placental cellular and syncytial trophoblast, autoradiographic light and EM, 418
– label, [^{3}H]glycine, role of protein synthesis and transglutaminase activity in formation of cross-linked envelope, human epidermal keratinocytes, biochemistry, 705
Radioactive label, [^{3}H]leucine, protein synthesis, human placental cellular and syncytial trophoblast, autoradiographic light and EM, 400
– label, [^{3}H]leucine, tropomyosin synthesis, differentiating muscle cells, biochemistry, and cytology, 98
– label, [^{125}I]α-bungarotoxin, acetylcholine receptors in Golgi apparatus, chick skeletal muscle cells, biochemistry and autoradiographic EM, 237
– label, [^{35}S]methionine, crystallin synthesis, calf lens epithelium, autoradiography and biochemistry, 175
Rana catesbeiana, gastric mucosa, ultrastructural changes and cyclic AMP in oxyntic cells, biochemistry and EM, 31
– *grylio*, urinary bladder, calcium modulation of epithelial water permeability, biochemistry, 787
Rat, hepatocytes, sites of lipoprotein particles and GERL, cytochemical EM, 1
–, liver, Golgi apparatus, *cis* and *trans* fractions, role in intracellular transport of serum-destined proteins, biochemistry and EM, 87
–, liver, microsomal vesicles, lipid biosynthesis on cytoplasmic surface, autoradiography and biochemistry, 245
–, liver, nucleus, isolation of envelopes with polyanions, biochemistry and EM, 191
–, liver, nucleus, skeleton and ribonucleoprotein complexes containing HnRNA, biochemistry and EM, 675
–, liver, nucleus, skeleton and small molecular weight RNA, biochemistry and EM, 692
–, mammary gland, membrane structure during milk fat secretion, freeze-fracture EM, 767
–, pancreas, secretagogue inhibition of enzyme secretion, biochemistry and EM, 467
–, parotid acinar cells, uptake of horseradish peroxidase by endocytic vesicles, cytochemical EM, 207
–, peripheral nerve, disassembly of neurofilaments, EM, 50
–, skin, epithelial cells and myofibroblasts, cytoplasmic filaments and gap junctions during wound healing, immunofluorescence and freeze-fracture EM, 561
–, trachea, epithelium, steroid localization in centrioles and basal bodies, immunofluorescence, 255
Receptors, acetylcholine, antibody binding to, *Electrophorus* and *Torpedo* electroplax membrane, immunohistochemistry, 577
–, acetylcholine, in Golgi apparatus, chick skeletal muscle cells, biochemistry and autoradiographic EM, 237
–, concanavalin A, lateral electrophoresis of, embryonic muscle cell membrane, biochemistry and fluorescence microscopy, 483
Retina, frog, subcellular localization of divalent cation probe chlorotetracycline, fluorometry and light microscopy, 386
Ribonucleoprotein complexes containing HnRNA, rat liver nuclear skeleton, biochemistry and EM, 675

RNA, heterogeneous, ribonucleoprotein complexes, rat liver nuclear skeleton, biochemistry and EM, 675
–, small molecular weight, rat liver nuclear skeleton, biochemistry and EM, 692

S

Saline, effect on neurofilament disassembly, rat peripheral nerve, EM, 50
Sea urchin *Arbacia* and *Lytechinus*, sperm, movement of flagella, cinemicrography, 310
– urchin *Strongylocentrotus franciscanus*, eggs and sperm, binding of fluorescein colchicine, light and fluorescence and scanning EM, 619
Secretagogue inhibition of enzyme secretion, rat pancreas, biochemistry and EM, 467
Secretion granule membranes, rabbit parotid, selective removal of secretory contaminants, biochemistry and fluorography, 323
Sertoli cells, complex junctions between, dog testis, freeze-fracture and lanthanum tracer EM, 57
Skin, rat and rabbit, epithelial cells and myofibroblasts, cytoplasmic filaments and gap junctions during wound healing, immunofluorescence and freeze-fracture EM, 561
Slime mold *Dictyostelium discoideum* and *D. mucoroides*, interphase nucleus, dimethyl sulfoxide induction of intranuclear actin bundles, EM, 146
Spectrin, distribution of, human erythrocyte membrane, immunochemistry and freeze-etch EM, 512
Sperm, sea urchin, binding of fluorescein colchicine, light and fluorescence and scanning EM, 619
–, sea urchin, movement of flagella, cinemicrography, 310
Spermatozoon, termite, multiflagella, Nomarski and scanning EM, 569
Spindle pole body, *Coprinus*, fusion and division of during meiosis, light and EM, 761
Spokes, radial, axoneme of *Chlamydomonas* flagella, biochemistry and light and EM, 729
Steroid localization, centrioles and basal bodies, immunofluorescence, 255
Stimulus-secretion coupling, intracellular divalent cation release during, pancreatic acinar cells, use of fluorescent probe chlorotetracycline, biochemistry and fluorometry, 371
Strongylocentrotus franciscanus, eggs and sperm, binding of fluorescein colchicine, light and fluorescence and scanning EM, 619
Sugar transport, 3T3 cells, effect of dihydrocytochalasin B, biochemistry and cytology, 360
Sugars, effect on chlorotetracycline probe of calcium, mouse pancreatic islet cells, fluorescence microscopy, 652
Surface, cell, changes during in vitro differentiation, lectin binding to avian neural crest cells, biochemistry and fluorescence microscopy and histochemistry, 628
– membrane, human fibroblasts, fibronectin distribution, immunofluorescence and immuno-EM, 748
–protein, distribution of, human erythrocyte membrane, immunochemistry and freeze-etch EM, 512
Surface topography, aggregate interiors, 3T3 and SV40-virus transformed 3T3 cells, scanning EM, 639
Syncytiotrophoblast, human placenta, glycoprotein synthesis, autoradiographic light and EM, 418
–, human placenta, protein synthesis, autoradiographic light and EM, 400

T

Temperature, very low, with ultrahigh vacuum, freeze-fracture EM, 712
Termite *Mastotermes darwiniensis*, spermatozoa, multiflagella, Nomarski and scanning EM, 569
Testis, dog, complex junctions between Sertoli cells, freeze-fracture and lanthanum tracer EM, 57
Tetrahymena pyriformis, cilia, dynein arm conformations, sliding force generation, light and EM, 261
Tissue culture, chick bone marrow cells, plasma stimulation of heme accumulation and erythroid colony formation, cytochemistry, 184
– culture, chick skeletal muscle cells, acetylcholine receptors in Golgi apparatus, biochemistry and autoradiographic EM, 237
– culture, differentiating muscle cells, tropomyosin synthesis, biochemistry and cytology, 98
– culture, Japanese quail neural crest cells, lectin binding during in vitro differentiation, biochemistry and fluorescence and histochemistry, 628
– culture, Novikoff hepatoma cells, low resistance junctions, correlation with gap junctional areas, electrophysiology and freeze-fracture EM, 532
Toad *Xenopus laevis*, embryonic muscle cells, lateral electrophoresis of membrane concanavalin A receptors, biochemistry and fluorescence microscopy, 483
Topography, cell surface, aggregate interiors, 3T3 and SV40-virus transformed 3T3 cells, scanning EM, 639
Torpedo californica, electric tissue, antibody binding to acetylcholine receptors, immunohistochemistry, 577
Transglutaminase, role in formation of cross-linked envelope, human epidermal keratinocytes, biochemistry, 705
Triacylglycerol synthesis, cytoplasmic surface of rat liver microsomal vesicles, autoradiography and biochemistry, 245
Trophoblast, cellular and syncytial, human placenta, glycoprotein synthesis, autoradiographic light and EM, 418
–, cellular and syncytial, human placenta, protein synthesis, autoradiographic light and EM, 400
Tropomyosin synthesis, differentiating muscle cells, biochemistry and cytology, 98
Trypanosoma brucei, bloodstream form, kinetoplast DNA, biochemistry and EM, 293
Tubules, central, axoneme of *Chlamydomonas* flagella, biochemistry and light and EM, 729
–, rabbit kidney, ouabain binding, autoradiography and biochemistry, 278
Tubulin polymerization, effect of neuroblastoma proteins, biochemistry and EM, 547

V

Vacuum, ultrahigh, with very low specimen temperature, freeze-fracture EM, 712
Vesicles, microsomal, rat liver, lipid biosynthesis on cytoplasmic surface, autoradiography and biochemistry, 245

W

Water permeability, frog urinary bladder epithelium, calcium modulation of, biochemistry, 787
Wound healing, cytoplasmic filaments and gap junctions during, epithelial cells and myofibroblasts, immunofluorescence and freeze-fracture EM, 561

X

Xenopus laevis, embryonic muscle cells, lateral electrophoresis of membrane concanavalin A receptors, biochemistry and fluorescence microscopy, 483
